Setting up Inland email in Windows 10 Mail

Windows 10 comes with an email client built in. If you would rather not use this program, you can always download Thunderbird from here: <u>http://www.thunderbird.net/en-US</u>.

CHANGING EXISTING ACCOUNT SETTINGS IN WINDOWS 10 MAIL:

If you already use Windows 10 Mail, you can click on **ACCOUNTS** and then double click on your Inland account to the right to modify the settings.

From there click on **CHANGE MAILBOX SYNC SETTINGS** down below.

SETTING UP WINDOWS 10 MAIL FROM SCRATCH

This email program comes installed with Windows 10. When you first open it, you can click on **Accounts**, then click on the plus for **Add Account**.

Scroll clear down to the bottom and click Advanced setup

Click on Internet email

This finally gets us down to the settings area. Settings:

- Email address is your entire address
- User name is your username ONLY, NO @INLANDNET.COM on there
- Password
- Account name can be anything, but will make more sense if you call it Inland
- **Name** (this can be anything you want to appear as your name on emails)
- Incoming mail server should be mail.inlandnet.com:995
- Account type should be POP3
- Outgoing (SMTP) email server should be mail.inlandnet.com:587
- ALL CHECK BOXES SHOULD BE CHECKED BELOW
- Just hit **Done** down at the bottom and it should be good to go
